

Greener Grass! Better Service! Guaranteed Results!

Today's Application: Summer and/or Grub Control

- Today we applied a slow release fertilizer plus a grub control application to help prevent grub damage.
- We treated for broadleaf weeds and nutsedge as needed.

This application will "spoon feed" the lawn through the summer & it will help the lawn recover quicker from summer stress. If on your program, grub control was also applied to help prevent damage to your lawn from white grubs. Broadleaf weed control was applied as needed to control weeds like dandelions and clover.

THE ATTACK OF GRUBZILLA!

The grotesque Grubzilla is preparing to invade the city and is set on causing panic and despair. The gross white grub and his underlings could consume every grass plant in sight. The repulsive Grubzilla is set to devour every lawn he can get one of his six hands on. *Can he be stopped? Can your lawn be saved? Can GRASSMAN with his ClassicLawns super powers save the day?*

You should know by now that GRASSMAN is here to put an end to Grubzilla's appalling appetite. With the powers of **ClassicLawns**, GRASSMAN will stop him from using this city's lawns as his own personal salad bar. Our **ClassicLawns** grub control will prevent Grubzilla from destroying your lawn.

Seriously, if we applied Grub Control to your lawn, it will be protected from any grub damage. Guaranteed! If the very slim chance happens and you get grubs, we will come back and kill them for **FREE**. Plus, if they do any damage, we will fix it for **FREE**!

Meanwhile, go to our website getagreenerlawn.com and watch the exciting Episode 3 of THE CONTINUING ADVENTURES OF GRASSMAN, "The Attack of Grubzilla" Meet new characters like TV Anchorman Jon Maroon, Suzy St. Lawn and of course Grubzilla! So, go waste 3 minutes of your life and watch it right now, we guarantee you'll laugh at least once!

"NEVER FEAR CITIZENS! GRASSMAN IS HERE TO PROTECT YOUR LAWN FROM THE EVIL AND UGLY GRUBZILLA. GRUBZILLA IS NO MATCH FOR MY **CLASSICLAWNS** SUPER POWERS!"

Fez says, "Yellow Nutsedge is hard to control because it is not a grass or a broadleaf weed. It is a sedge. Unfortunately, no one can prevent nutsedge from coming up, However, **ClassicLawns** can control it when it does.

A FEW THINGS TO CONSIDER...

Here are a few things to consider when you are out working in your lawn.

- Treat evergreens for bagworms!
- Now is a great time to prune and shape your trees & shrubs!
- Add new mulch to your beds to reduce weeds and to provide organic material for the soil!
- Protect your trees from your mower and weed eater by placing a mulch ring around your trees.
- Sharpen your mower blade!
- Try to only water your lawn between 2AM and 11AM to reduce disease problems!
- Make sure we have your e-mail address!
- Become a fan of **ClassicLawns** on Facebook!
- Be sure to give your lawn ATLEAST 1" of water per week!
- Go watch Episode 3 of THE CONTINUING ADVENTURES OF GRASSMAN! Let us know what you think of it.

If you need help with anything or if you have any questions, please call us or e-mail us anytime!

HOW DO WE CONTROL GRUBS?

We apply a product to control grubs in June & July. Once activated by water this product is taken up by the grass' roots and is moved through the plant. When the grub eats the plant it then dies. The grub control product we applied today is over 90% effective at preventing grub damage. Be sure to water today's application in within 10 days for best results.

Fez Says, "WATER ME!"

We had a very wet spring, but we all know the rain will stop this summer at some point. When it does don't forget that grass needs an inch of water per week to survive & more to thrive. There is really no such thing as letting grass go dormant by not watering. Grass is a living organism and it **has** to have water to live. You don't have to water every day

for hours on end. We don't recommend doing that either. That could cause disease problems. Yet, if you want to keep your grass, water at least an inch a week for it to survive & more for it to thrive! To help avoid disease problems try to water only between 2AM & 11AM. However, watering at the wrong time is better than not watering at all."

Summertime!

I love the Summer. It is filled with tons of fun activities. Summer is the time for lakes, rivers, beaches and vacations. Baseball is in full swing. Shorts, tank tops and flip flops are the uniform of the season. Hot sun filled days and warm starry nights fill my soul. When we were kids summer seemed to last forever. Now it goes by so fast!

There is so much going on and so much to do in the summer that it can be easy to neglect your lawn. The hot, humid days can be tough on lawns. This time of year can be frustrating. It sometimes feels like all the hard work we've done on the lawn has been for naught. The two biggest problems are disease and drought.

DISEASE

Most lawn diseases are caused by fungus. These fungi are in the air all the time. When weather conditions are just right and if your grass is susceptible, disease occurs. Most diseases are a short term problem and grass usually recovers. To combat disease do this:

- Mow weekly & mow high (3"-3.5")
- Make sure your blade is **SHARP!**
- Try to water only between 2 AM and 11 AM.
- If disease gets too bad, call us for a fungicide treatment.
- Over seed in the fall with a disease resistant grass variety.

DROUGHT

When it starts getting hot and dry, many people feel that watering is a futile effort. It is not. Grass does not truly go dormant. Grass can and does die from a lack of water. Replacing grass by seeding or sodding is expensive. Plus, you have to water even more to help new grass get established. So, in the long run it is cheaper to water the grass you currently have than to let it die, replace it and then water new grass. You can let your grass turn brown, but you **CAN'T** completely quit watering. One inch of water per week may not keep it green, but it will keep it alive. Then, when temperatures cool down, your grass that you have been watering will recover and you will be spared the expense of seeding. Call us for some watering tips and tricks and don't forget to water your trees!

Enjoy your Summer while it lasts!

Am I 'BUGGING'
you?

Lawn Flea, Tick & Insect Control

Our Lawn Flea, Tick & Insect Control can make your lawn more enjoyable! Don't share your lawn with annoying, biting insects like fleas and ticks. Have us treat your lawn so you can enjoy your time outdoors with your friends and family.

Fez Q. Grass

Protect Your Pets

So you've treated Rover with the products from your Veterinarian, now take care of your lawn! Your pets go outside and can be bombarded by tons of insects like fleas and ticks. Our Flea, Tick & Insect Control will knock down those pesky fleas, ticks, chiggers and other biting insects! This will make Rover and happy! Our Flea, Tick & Insect Control is family and pet friendly and is safe to be on as soon as it dries!

Super Fast Acting

Classic Lawns Flea, Tick & Insect Control starts working instantly. You don't have to water. Bugs start dying on contact and your lawn will be bug free and ready to enjoy as soon as we are finished! Are you having an outdoor barbecue or party? Have us treat your lawn so your guests can sit outside without getting bitten nonstop. Take back your lawn from the bugs!

Protect Your Lawn

The Flea, Tick & Insect Control not only protects your pets and kids from annoying insects, but it protects your lawn from turf destroying insects like armyworms, cutworms and sod webworms. These insects are larvae of moths and can cause significant damage to your lawn by chewing your grass blades right at the soil line! This causes the turf to thin out and makes brown patches. This obviously weakens your turf and makes it more susceptible to other issues like heat & drought stress and diseases.

It Is Affordable! PLUS, now you get \$5.00 off

Classic Lawns' Flea, Tick & Insect Control is the SAME price as your regular lawn application. Hurry and sign up before September 7th and get \$5.00 OFF!

*Be bug FREE and enjoy your lawn!
Give us a call whenever you are getting "BUGGED" and
we will be right out!*
