

Grass Growing, Outdoor Loving, Hard Working, Lawn Care Experts!

**Today's Treatment:** Early Spring Lawn Application

**What We Applied Today:** Today we applied a balanced slow releasing fertilizer, a pre-emergent to help prevent grassy weeds, and if temperatures permitted we treated for any broadleaf weeds in your lawn.

**What Today's Treatment Does:** This app. will feed your lawn and provide a quick green up. The pre-emergent will help prevent grassy weeds such as crabgrass & foxtail. We also treated any broadleaf weeds present like dandelion, henbit & chickweed.

**What You Should Do For Best Results:** If it does not rain within 10 days, please try to water your lawn. Mow anytime after today. Mow shorter (2") the first time, then mow as high as possible (3.5"-4") for the rest of the season and make sure your mower blades are sharp.

**Finally! A Real Winter?**

I loathe the Winter! I think I may be part reptilian. I am not a big fan of the snow or the cold temperatures. So, the previous two winters were awesome for me! Hardly any snow and 80 degrees in February, I will take anytime!

Although we did not get much snow or any moisture for that matter until late February, we did get some super cold temperatures. Believe it or not, those cold temps may actually help us out! Annoying insects like fleas, ticks, and mosquitos just may have been knocked back! Turf damaging insects like cutworms, sod webworms, and grubs may be less prevalent due to those hard freezes this winter! Remember to keep **ClassicLawns'** number handy if you need your lawn treated for any insect problems!

Our detested friend Bermuda Grass just might have been slowed down a bit with the cold weather knocking it back! Other weeds may be slow to germinate this year as well due to the colder soil temperatures.

So, even though I despise Old Man Winter, he just maybe helped us out this year! Don't worry! Whatever Mother Nature throws at us, **ClassicLawns** can handle it! We are here for you! Call, text, or e-mail us anytime!

**Lets have a GREAT 2018 Season!**

  - Like **ClassicLawns** on Facebook! [www.facebook.com/classiclawn](http://www.facebook.com/classiclawn)s
- If you need help with anything or if you have any questions, please call , text, or e-mail us anytime!

## COL. CRABGRASS VS. DR. DANDELION

Just a quick reminder that the preemergent applied today does an excellent job of preventing grassy weeds like crabgrass and foxtail. However, preemergents do **NOT** control dandelions, henbit, clover, and other broadleaf weeds. That is because preemergents are mainly effective on annual grassy weeds such as crabgrass and foxtail and do **NOT** prevent broadleaf weeds like dandelions.

Col. Crabgrass

Dr. Dandelion

The best preventative control of broadleaf weeds is to keep your lawn as thick and healthy as possible so that broadleaf weeds struggle to compete. **ClassicLawns** fertilizer program is designed to do just that. Plus, we treat for broadleaf weeds with every app. if temperatures permit. If any dandelions or any other of its' broadleaf cousins show up, we kill them.

**Remember, service calls are always FREE if weeds pop up between applications!**

## LET'S TURF TANGO

I am not a big fan of that TV show *Dancing with the Stars*, but I will reluctantly admit that I have seen an episode or two. If we are honest, we all watch it to see some quasi celebrity trip over their two left feet and make a fool of themselves on live TV. However, we all love when a dancing pair is in sync, their movements flow as one and their chemistry drips off the screen. Dancing is a beautiful thing! Especially, the sultry and seductive TANGO!

We have all heard that old saying that it takes two to tango. Well, let's turf tango. Shall we?

Turf Tango you ask? Yes! You and **ClassicLawns** on the dance floor. Ok, on your lawn. When you hired **ClassicLawns**, we became partners. Hopefully, we can dance in sync and not trip over my two left feet. As your dance partner, **ClassicLawns'** promise to you is to provide the BEST service, use the BEST possible products, to be available to answer questions, to always do the right thing for you and your lawn, and to provide you with as much information as possible for a GREAT lawn!

**ClassicLawns will lead.** All we ask in return in this Turf Tango is that you follow and communicate. Follow our instructions for a great lawn and communicate with us if things need to be different. We leave all kinds of info for you and your lawn here in these newsletters, our email newsletter, our website and in person. If something isn't right in your lawn and you've followed our instructions, PLEASE call us! Text us! Send us an email! We are here to help ...and dance!

So, grab those mowing shoes AND set up that sprinkler. I will bring my spreader and some fertilizer and LET'S TANGO. TURF TANGO!

Cary Carlson
